PashuRakshak (RescueNet)

AI-Assisted Stray Animal Welfare & Rescue Platform — UI/UX & Google Stitch Prompt Specification

Executive Summary: PashuRakshak is a localized AI-powered stray animal welfare management system built for Dombivli, Maharashtra. It seamlessly connects Citizens, Rescue Volunteers, NGOs, and KDMC Municipal Officers. This document contains comprehensive design requirements, visual style tokens, user role workflows, and ready-to-use **Google Stitch AI prompts** for automated UI/UX generation.

1. Visual Identity & Design System Tokens

Element	Specification / Color Hex	Usage & Context
Primary Brand Color	**#059669 (Emerald)**	Buttons, active status, success badges, main brand theme.
Emergency Accent	**#EF4444 (Crimson Red)**	SOS trigger buttons, emergency priority alerts, high-risk flags.
AI Badge Accent	**#06B6D4 (Neon Cyan)**	AI confidence scores, RF-DETR detection tags, DINOv3 match badges.
Background Surfaces	**#0F172A / #F8FAFC**	Glassmorphism dark slate surfaces & clean light mode background.
Typography	**Inter / Plus Jakarta Sans**	Clean, accessible sans-serif font family with high legibility.

2. Target User Roles & Platform Ecosystem

- **Citizen / Public User:** Simple mobile-first experience to report stray animals in emergency, check live community updates, apply for pet adoptions, and make transparent donations.
- **Field Volunteer / Rescue Worker:** Task-driven PWA interface for accepting rescue calls, navigating to incident locations, updating status, and running live AI biometric video verification.
- **KDMC Municipal Officer & NGO Admin:** High-density desktop command center to review AI duplicate consensus, manage emergency dispatch queues, assign shelters, and view city heatmaps.

3. Detailed Screen Breakdown & Google Stitch Prompts

Screen 1: Citizen Mobile Feed & Live Community Wall

Target User / Device: Citizen / Mobile PWA

Google Stitch Generation Prompt:
"A mobile web app feed for 'PashuRakshak', a stray animal rescue platform. Include a header with quick location selector ('Dombivli East'), notification bell, and a prominent Floating Action Button (FAB) labeled 'Report Animal SOS'. Below the header, show stories/announcements carousel, followed by a filterable feed of reported animals (Tabs: 'All', 'Emergency', 'Rescued', 'Adoptions'). Feed cards feature an animal photo, AI confidence badge (e.g. 'Dog • 92% AI Verified'), timestamp, distance, status tag ('In Progress' in amber), and action buttons (Upvote, Comment, Share). Use a sleek dark slate background with emerald green accents."

Screen 2: AI-Assisted Emergency Animal Reporting Form

Target User / Device: Citizen / Mobile PWA

Google Stitch Generation Prompt:
"A multi-step mobile modal/screen for reporting an injured stray animal. Step 1: Photo/Video upload dropzone with real-time AI scanning animation ('RF-DETR Scanning... Identified: Dog, Bleeding Injury'). Step 2: Auto-captured GPS location map card with editable landmark notes. Step 3: Priority slider & description field. Show a dynamic AI Priority Alert banner at the top ('Emergency Score: 88/100 - Dispatching High Priority Alert'). Include a bright red 'Submit Rescue Request' primary button."

Screen 3: On-Site AI Live Video/Photo Verification Camera

Target User / Device: Volunteer / Field Worker

Google Stitch Generation Prompt:
"A mobile full-screen AR camera interface for rescue volunteers verifying animal identity on site. Includes a camera viewfinder with a bounding box overlay around a dog, a live match indicator badge at the top ('Gemini AI Match: 86% - Case #RN-8A2F'), side-by-side thumbnail of original complaint photo for visual comparison, and action buttons at the bottom: 'Confirm Match & Pick Up', 'Retake Scan', and 'Flag Mismatch'."

Screen 4: Officer & NGO Emergency Triaging Dashboard

Target User / Device: KDMC Officer & Admin / Desktop

Google Stitch Generation Prompt:
"A high-density desktop dashboard for Municipal Officers & NGO Admins. Left sidebar: Navigation (Overview, Emergency Queue, Duplicate Audit, Dispatcher Map, Analytics). Main panel top: Metric stat cards (Active Cases, Emergency SOS, Volunteers Active, Rescued Today). Middle section: Split view — Left half has an emergency complaint queue sorted by AI Priority Score with duplicate warning badges ('Potential Duplicate - 96% DINOv3 Similarity'). Right half has an interactive spatial map of Dombivli showing color-coded pins (Red: Emergency, Amber: In Progress, Green: Resolved)."

Screen 5: Stray Animal Adoption Marketplace

Target User / Device: Public / Responsive Desktop & Mobile

Google Stitch Generation Prompt:
"A vibrant and warm desktop/mobile web page for animal adoption. Top search bar with filters for species (Dog, Cat, Pup), age, gender, and vaccination status. A grid of pet profile cards displaying cute photos, name, age, shelter/foster location, medical tag ('Vaccinated & Neutered'), and a heart bookmark button. Clicking a card opens a modal with photo gallery, personality traits chips ('Friendly', 'Good with Cats'), rescue backstory, and an 'Apply for Adoption' button."

Screen 6: Transparent NGO Donation & Impact Dashboard

Target User / Device: Public & Donors / Responsive

Google Stitch Generation Prompt:
"A modern transparent donation dashboard for animal welfare. Includes live campaign progress bars ('Medical Fund for Dombivli Strays - 78% Funded'), recent donor activity ticker, quick amount selector buttons ($10, $25, $50, Custom), and UPI/QR code payment options. Features an 'Impact Breakdown' chart showing exact allocation of funds (60% Medical Care, 25% Food, 15% Shelter Upgrades)."

4. Essential AI Features & Micro-Interactions

- **RF-DETR Object Detector:** Provides instant visual detection feedback (species, confidence level) right inside the report form dropzone.
- **DINOv3 Duplicate Engine:** Displays visual warning badges ('Duplicate Suspicion 96%') to officers to prevent redundant rescue dispatches.
- **AI Emergency Scoring:** Ranks complaints automatically from 0 to 100 based on distress keywords and visual injury severity.
- **Gemini Biometric Live Verifier:** Guides field volunteers with live camera bounding boxes to ensure the rescued stray matches the filed complaint.
